HACKHAZARDS '26 Participant Manual

All Guidelines, Partner Tech Resources, Participation Rules, Submission Rules, Judging and Scoring Rules

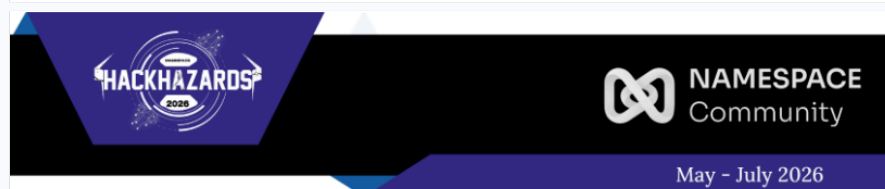

(Please read this manual using common sense and general intelligence)

- This document is prepared to aid the participants of HACKHAZARDS '26 during the project submission period and beyond.
- It is the participants' responsibility to read this document carefully and understand all the points. In case of any doubts, reach out to the organizers on public forums such as the Discord server and WhatsApp groups.
- This document is created to assist the participants while they take part in the hackathon and the material present in no way constitutes a legal agreement between (NAMESPACE, NAMESPACE Community, its organizers, associates, sponsors or partners) and the participants.
- If you think an issue has not been covered in this document, feel free to reach out to us on the public channels i.e. WhatsApp groups and Discord server and we will do our best to include the relevant info ASAP.

Finally, all the best, you are competing in one of the best global hackathons, we expect you to learn, innovate and build something amazing during these weeks of pure hacking fun.

Brief Highlights

1. HACKHAZARDS '26 is a fully-digital, multi-theme, open-innovation hackathon.
2. There are no fixed problem statements. Only themes. Projects must fall in at least one of those themes.
3. There are optional Sponsored Tracks which fetch additional points and make you eligible for additional prize money.

4. Participants can participate in teams of 1-4 members. Team formation is a necessary step for solo participation also.
5. Each team can submit up to 3 projects in HACKHAZARDS '26. Prizes are considered at the project-level and hence, a team can win multiple prizes for multiple projects as well.
6. There are no shortlisting, or filtering rounds, all teams are expected to build and submit their final projects.

Important Dates

- 01st May 2026, 21:00 HRS IST - Build Submissions Open
- 13th July 2026, 23:59 HRS IST - Build Submissions Close
- 31st July 2026 (Tentative) - Results Announcement (Top 5, 25, 50, 100 and Track Winners) and Closing Ceremony

All dates are subject to change as per the discretion of the organizers.

Problem Statements and Themes

HACKHAZARDS '26 is a fully open-innovation, software-first hackathon. Unlike traditional hackathons, there are no predefined problem statements. Participants are encouraged to identify real-world problems they care about, explore unmet needs, and build solutions that are meaningful, impactful, and technically sound.

You are free to:

- Choose any problem statement of your own
- Build for any user group or industry
- Use any tech stack or framework

- Integrate AI or Web3 elements into your project
- Ship your solution in any form such as a web app, mobile app, desktop application, browser extension, API, or platform

The only requirement is that your project must be a **software-based** solution and should align with at least one of the following themes.

Participants are also encouraged to align their project with multiple themes where relevant, as most real-world problems exist at the intersection of domains.

Themes

01. Human Experience & Productivity

Software that enhances how individuals live, think, and work. This includes productivity tools, habit-building systems, mental health platforms, accessibility solutions, personal AI assistants, and applications that improve individual efficiency and wellbeing.

02. Climate & Sustainability Systems

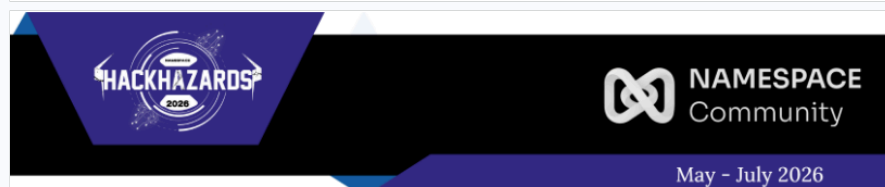

Software addressing environmental challenges and enabling sustainable practices. This includes climate analytics, carbon tracking, energy systems, agri-tech platforms, waste management tools, and solutions for environmental monitoring and resilience.

03. HealthTech & Bio Platforms

Software solutions focused on healthcare, wellness, and biological systems. This includes telemedicine, health data platforms, diagnostics, wearable integrations, preventive care systems, and tools supporting medical or bio research.

04. Learning & Knowledge Systems

Software that enables learning, education, and knowledge sharing. This includes EdTech platforms,

AI tutors, peer-to-peer learning systems, skill development tools, and knowledge management or research tools.

05. Work, Finance & Digital Economy

Software powering how individuals and organizations create and exchange value. This includes

fintech applications, SaaS platforms, creator economy tools, marketplaces, remote work tools, and systems enabling new economic models.

06. Infrastructure, Mobility & Smart Systems

Software that operates and optimizes large-scale systems. This includes logistics platforms, mobility solutions, smart city systems, IoT dashboards, campus infrastructure tools, and real-time system monitoring platforms.

07. Trust, Identity & Security

Software that ensures safety, privacy, and trust in digital systems. This includes authentication systems, identity management, cybersecurity tools, fraud detection, and privacy-preserving technologies.

08. Media, Social & Interactive Platforms

Software that enables communication, content creation, and digital interaction. This includes social platforms, community tools, gaming systems, content distribution platforms, and interactive or immersive experiences.

09. Public Systems, Governance and Civic Tech

Software designed for governments, institutions, and societal systems. This includes public service platforms, governance tools, civic engagement systems, nonprofit tools, and solutions for crisis response and resource coordination.

10. Developer Tools & Software Infrastructure

Software that enables developers to build and scale other software. This includes APIs, SDKs,

May - July 2026

backend systems, cloud infrastructure, deployment tools, databases, and developer productivity platforms.

How to approach themes:

- Start with a problem, not a theme.
- Identify a real-world problem you care about, then map your solution to the most relevant theme(s). Projects can span multiple themes.
- Themes are meant to guide your thinking, not restrict it.

Sponsored Tracks and Challenges

HACKHAZARDS '26 has below mentioned Sponsored Tracks/Challenges. These are optional sponsored tracks. You can participate in one to unlock partner-specific benefits and prizes, or build independently without selecting a track. Partner tracks unlock additional prizes (mentioned in the "Prize Pool" section) and Bonus Points (Mentioned in the "Judging and Scoring" section).

01. Expo Track - Build Mobile Apps With Expo

About the Partner

Expo is a platform built on React Native that helps developers create mobile apps using JavaScript or TypeScript without dealing with complex native setups. It simplifies development, testing, and deployment so builders can focus on product and user experience.

Objective

Build a mobile-first application that delivers real value to users. The core experience should be designed for mobile and not just adapted from the web.

Mandatory Tech

- The application must be built using Expo (React Native)
- Core functionality should run within the Expo ecosystem
- A working mobile demo must be provided (APK, Expo Go link, or equivalent)

Judging Criteria

- Product quality and user experience
- Mobile-first thinking and interface design
- Technical implementation using Expo
- Completeness and functionality of the app
- Real-world usefulness and clarity of use case

What Qualifies

- A working mobile app built with Expo
- Clear user flow and usable interface
- Functional features that go beyond static screens

What Disqualifies

- Projects built primarily as web apps and wrapped as mobile
- Minimal or token use of Expo
- Broken demos or non-functional builds
- Only UI mockups without working logic

02. Neo4j Track - Build Databases with AuraDB

About the Partner

Neo4j is a leading graph database platform designed for connected data. AuraDB is Neo4j's fully managed cloud database service that allows developers to build and scale graph-powered applications without managing infrastructure.

Objective

Build a solution where relationships are central to how the product works, powered by AuraDB. The use of a graph database should not be optional or secondary. It should be the reason your product works better.

Mandatory Tech

- The project must use **Neo4j AuraDB as the primary database**
- All core data interactions must be handled through AuraDB
- Graph data modeling must be central to the backend architecture
- The project must include real queries executed on AuraDB

Judging Criteria

- Depth and correctness of graph data modeling in AuraDB
- How effectively AuraDB is used to power core product features
- Complexity and usefulness of relationships and queries
- Technical implementation including schema design and query logic
- Overall product usefulness

• Create product experiences

What Qualifies

- AuraDB is used as the main data layer of the application
- Product features are directly powered by graph queries
- Clear demonstration of live queries and outputs from AuraDB
- Relationships actively drive functionality, not just storage

What Disqualifies

May - July 2026

- AuraDB used only as a secondary or optional database
- Minimal or token usage of graph features
- Hardcoded or mocked data instead of real AuraDB queries
- Using Neo4j without actually integrating AuraDB
- No clear role of graph relationships in the product

03. Base44 Track - Build Prototypes with Base44

About the Partner

Base44 is a rapid prototyping platform that helps builders turn ideas into functional products quickly. It is designed for fast iteration and early validation.

Objective

Build a functional prototype or MVP that clearly demonstrates your idea. The focus is on speed, clarity, and execution.

Mandatory Tech

- The core prototype or finished project must be built using Base44
- The submission should include a working flow, not just static screens
- External tools can be used, but Base44 must be central

Judging Criteria

- Clarity of idea and problem statement
- Speed and completeness of execution
- Functionality of the prototype
- User flow and experience
- Potential for real-world validation

What Qualifies

May - July 2026

- A working prototype with clear flow
- Demonstration of core features
- Logical and complete user journey

What Disqualifies

- Only design mockups or static screens
- Incomplete flows or broken interactions
- Minimal or no use of Base44

- Ideas without functional demonstration

04. Sarvam Track - Build AI Applications with Sarvam

About the Partner

Sarvam is an Indian AI company building foundational models and AI infrastructure for developers and businesses. Their ecosystem focuses on multilingual AI, voice AI, and scalable AI capabilities designed for Indian and global use cases.

Objective

Build an AI-powered product where Sarvam APIs play a central role in the user experience or product functionality. The use of AI should be meaningful and deeply integrated into how the product works.

Mandatory Tech

- The project must integrate and actively use Sarvam APIs
- Core product functionality should rely on Sarvam's AI capabilities
- The submission must include a working demo with live AI interactions
- Projects can use additional technologies, but Sarvam integration must remain central

Judging Criteria

- Depth and quality of Sarvam API integration
- Practical usefulness of the AI-powered experience
- Creativity and originality of the use case
- Technical implementation and product execution
- User experience and overall functionality

What Qualifies

- Applications where AI meaningfully improves the product experience
- Working implementations using Sarvam APIs
- Real prompts, outputs, or AI workflows demonstrated live
- Use cases involving voice AI, multilingual AI, automation, assistants, productivity, education, accessibility, or similar domains

What Disqualifies

- Minimal or token usage of Sarvam APIs
- Hardcoded or mocked AI responses instead of live API usage
- Projects where AI is not central to the product
- Broken demos or incomplete AI workflows
- Only UI mockups without functional implementation

Sarvam Credits

For teams participating in HACKHAZARDS '26 Sarvam is providing 1000 credits per team. These credits can be claimed once per team by any one of the team members. To claim the credits, please go to the HACKHAZARDS '26 Hackathon Dashboard and fill the form available (link accessible only to registered participants):

<https://www.namespace.world/hackathon-dashboard/29fe1a24-ef95-4a24-bba2-388b4b2cc89f>

May - July 2026

05. Render Workflows Track - Build Durable AI Agents & Automated Systems

About the Partner

Render is a modern cloud platform that helps developers deploy and scale applications. Render Workflows is a durable execution and orchestration engine that enables developers to run long-running, distributed tasks with built-in retries, parallel execution, autoscaling, and observability. It is designed for AI agents, background jobs, data pipelines, batch processing, and other workflow-driven applications.

Objective

Build a product powered by automated workflows where complex tasks are executed reliably in the background using Render Workflows. Your project should demonstrate how workflow orchestration improves reliability, scalability, or user experience. The workflow should be central to the product, not an optional add-on.

Mandatory Tech

- The project must use Render Workflows.
- At least one workflow must consist of multiple connected tasks or stages.
- Workflow execution must be demonstrated through a live deployment on Render.
- The workflow must perform meaningful work beyond simple deployment or API calls.
- The submission must include evidence of workflow runs, logs, or execution flow.

Judging Criteria

- Depth of Render Workflows integration
- Complexity and usefulness of workflow orchestration
- Effective use of distributed or long-running tasks
- Reliability, automation, and scalability of the solution
- Overall product usefulness and user impact

What Qualifies

- AI agents that coordinate multiple tasks or tools
- Workflow-driven automation systems
- Multi-stage document, media, or data processing pipelines
- Parallelized or distributed workloads
- Applications where workflows are critical to the product experience
- Clear demonstration of Render Workflows handling execution

What Disqualifies

- Projects deployed on Render without using Render Workflows
- Simple CRUD applications with no workflow orchestration
- Single-step API wrappers with no workflow logic
- Mocked workflows or hardcoded outputs
- Minimal or token usage of Render Workflows
- Broken or non-functional workflow demonstrations

Render Credits

For teams participating in HACKHAZARDS '26, Render is providing \$50 USD in Render credits to every participant. These credits can be used for any project and any Render service, including application hosting, background workers, static sites, and other infrastructure needs during the hackathon. To claim your credits, please click on the below link and sign in using your GitHub: <https://credits-portal-mmdm.onrender.com/claim/hackhazards>

More info on credit redemption is available here: <https://render.com/docs/credits>

important: while all participants are eligible for Render credits, the Render workflows track is specifically reserved for projects that make meaningful use of Render Workflows. Simply deploying your application on Render does not qualify a project for the track. To be eligible for the Render Workflows prizes, workflow orchestration must be a core part of your project's functionality and product experience.

May - July 2026

Prize Pool

A. General Prizes (All projects eligible)

- a. 1st Prize: USD 1,000
- b. 2nd Prize: USD 800
- c. 3rd Prize: USD 600
- d. 4th Prize: USD 400
- e. 5th Prize: USD 200
- f. Rank 6 - 25: USD 50 each to all projects from Rank 6 to Rank 25
- g. Rank 26 - 50: USD 20 each to all projects from Rank 26 to Rank 50
- h. Rank 51 - 100: USD 10 each to all projects from Rank 51 to Rank 100

B. Track Prizes

- a. Expo: USD 500 (1st: 250, 2nd: 150, 3rd: 100) cash to the top 3 teams of the Expo track.
- b. Neo4j: USD 500 (1st: 250, 2nd: 150, 3rd: 100) cash to the top 3 teams of the Neo4j track.
- c. Sarvam: Sarvam credits worth USD 1,000 (1st: 500, 2nd: 300, 3rd: 200) to the top 3 teams of the Sarvam track.
- d. Render Workflows: Render credits worth USD 900 (1st: 500, 2nd: 300, 3rd: 100) to the top 3 teams of the Render Workflows track.

Rules regarding prizes:

1. All prizes are at the sole discretion of the organizers and where applicable at the discretion of Sponsors/Partners.
2. The USD to INR conversion rate for the General Prizes to be paid directly by NAMESPACE has been fixed at **INR 92.00 per USD**. Hence, Indian participants will be receiving INR corresponding to the USD amounts.

May - July 2026

3. The organizers, based on the quality of submissions, and on the basis of fulfilment of other eligibility criteria may choose to not announce or withdraw any of the above mentioned prizes without any further notice.
4. All prizes will be disbursed to the respective beneficiaries within 30 days of the announcements of final results.

Judging and Scoring

Scoring Head	Max Marks (Total 100 + 55 Bonus Points)

Fixed Points for all Projects	
Uniqueness of Idea	15
Complexity of Technology	30
Relevance of Solutions	20
Business and Economic Viability of the Solution	15
Design and User Experience	10
PPT, Demo Video, Deployment Link submitted	10
Total Fixed Points	100
Special and Bonus Points	
Special Points for Expo Track (Mobile App is built using Expo)	20
Special Points for Neo4j Track (Project uses AuraDB as the Primary Database)	20
Special Point for Base44 Track (Project/Prototype is built using Base44)	10
Bonus points for task 1 - Sharing badges on social media	2

Bonus points for task 2 - Writing a Blog Article on your Build Submission	3
Total Special and Bonus Points	55
Grand Total of Max points a project is eligible for	155

* Sarvam and Render Workflows track does not carry any additional Special or Bonus Points

What makes a Strong Submission:

Top-performing projects typically demonstrate:

- Clear problem understanding and relevance
- Thoughtful and well-scoped solution
- Strong execution and working functionality
- Clean user experience and usability
- Meaningful use of technology (not superficial)
- Ability to clearly communicate the idea

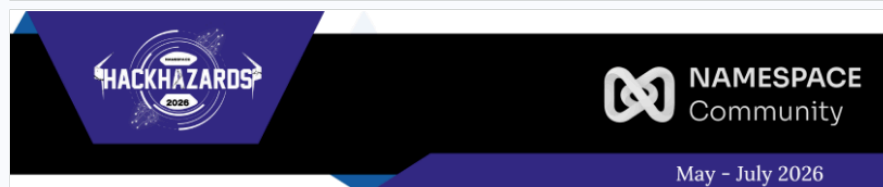

Projects that combine strong execution with real-world relevance and clarity tend to rank higher.

Notes:

1. For Special points for using partner technology:

- For claiming special points for Partner Tracks, the project should satisfy the criteria of that criteria. Please refer to the "Sponsored Tracks and Challenges" section of this document.
- A project can claim **all, none or some** of the special points if they fulfill the criteria of each of those tracks.
- To claim the Special Points for Partner Tracks, participants must select the appropriate track from among the options provided while making their project submissions.

2. For bonus points for tasks

For receiving the bonus points for the tasks, all members of the team must have completed those tasks and filled up the form.

a. Bonus task 1 - All team members should share the unique badges issued to them and sent over their emails on at least one social media platform. Optionally, there is another option of generating a photo badge from the HACKHAZARDS '26 Website. Participants are free to share either of them.

b. Bonus task 2 - At least one team member must write a blog article about their project (problem solved, tech-stack used, partner track used, implementation and challenges faced etc.) and publish on any of the given blogging platforms: Hashnode, Medium, Dev.to

To validate these tasks, participants need to fill up the "Bonus Points Claim Form" which will be available inside their hackathon dashboard. Link to the hackathon dashboard for HACKHAZARDS '26 (link accessible only to registered participants): <https://www.namespace.world/hackathon-dashboard/29fe1a24-ef95-4a24-bba2-388b4b2cc89f>

Please note that creating a team is mandatory for HACKHAZARDS '26 even if you want to participate solo. Submitting the forms or submitting a project requires a team to be created.

3. Apart from the above judging criteria, completing the mandatory task i.e. following at least 2 out of 3 NAMESPACE social media accounts is required, otherwise the team will not be eligible for any prizes.

As a mandatory requirement, all participants are required to follow at least 2 out of the 3 main social media accounts of **NAMESPACE**. For validation purposes, your social media usernames provided while registering for HACKHAZARDS '26 will be used.

Project/Build Submission Guidelines

1. All project submissions will happen on the NAMESPACE Platform. Participants need to submit the following on their NAMESPACE hackathon dashboard:

- a. GitHub repository link (mandatory)**
The GitHub repository should mandatorily consist of a readme file following a fixed template. The sample readme can be viewed in this demo repository <https://github.com/pradeeptosarkar/hackhazards26-demo-repository>. Feel free to clone this repository and use it for the hackathon. Otherwise, you can just copy paste the readme file and paste it in your own repository you will make for the hackathon and edit with your details.
- b. Demo video (should be public) (mandatory)**
The demo video should be strictly less than 5 minutes long and should provide a demonstration of your working project.
- c. Deployment link (highly recommended)**
A link(s) which allows the evaluators to use your built project. For mobile or desktop apps, link to download the executable or APK.
- d. PPT link (6 slides at max) (highly recommended)**
The presentation should be strictly limited to a maximum of 6 slides and should effectively communicate the key aspects of your project.
- e. Any other links which the participants think is relevant for better evaluation of their projects**
- f. While making the submission on NAMESPACE, please ensure that you are in the correct team and/or all your team members are correctly showing up. After a project is submitted there is no way to add/remove team members and those NAMESPACE usernames are deemed to have completed their participation in the hackathon.**
- g. On your hackathon dashboard, you can see the "Submit project" option, you should use that option to make your submission and mention all the details about your project,**

track/theme selection etc.

h. You can edit your draft as long as the Build Submission Window is open. After the submission period is over, no edits to the project are possible.

2. Please note that creating a team is mandatory for HACKHAZARDS '26 even if you want to participate solo. Submitting the required forms or submitting a project requires a team to be created.

Partner Tech Resources

The participants are expected to go through all the resources provided for the following partner technologies and especially if you plan to integrate one or more of these technologies into your projects. These resources are carefully curated to provide even beginners to get up and running with these amazing technology partners' toolkits.

Participation Rules, Terms and Code of Conduct

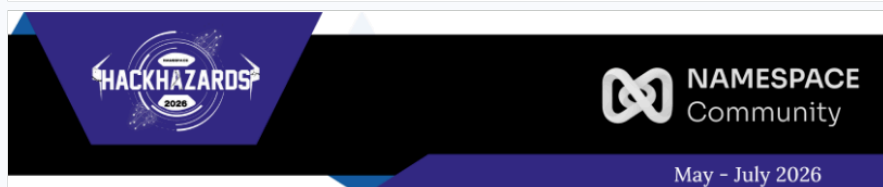

Participation Rules and Terms

All the participants of HACKHAZARDS '26 do hereby agree to carefully read and understand the participation rules, terms and conditions and any other material shared with them in order to participate in this competition in a fair manner. The organizers reserve the right to enforce any provisions as contained in these rules and regulations or otherwise and in respectful observance of local laws and regulations. By participating, in this hackathon all participants agree to the following:

- Participation
 - All participants understand that participation in this hackathon by registering on the platform does not guarantee active participation and each submission is under the active review of the organizers. The organizers reserve the right to reject any application, submission at any stage of the competition without specifying any reason whatsoever for such an action and with no compensation, information being due to be conveyed to the participant(s) in question.
 - All participants agree to follow the rules and code of conduct as given in this document and failure to comply will result in necessary action being taken against the participant(s) in question.
- Project submission

- All participants desirous of participating in the hackathon and consequently submitting a project along with any other material whatsoever in relation to their participation, shall be aware that merely project submission does not guarantee any prize money or swags or any other benefit in cash or kind.
- The organizers reserve the right to reject any project submission in any form or manner if any discrepancy, cheating or plagiarism is found. The organizers are not liable to specify any reason for such an action and no compensation, or return benefit shall be due to the participant(s) in question.
- The participants are advised in their own interest to properly follow all instructions conveyed by the organizers through all channels of communication being engaged for this hackathon and it is the responsibility of participants to ensure proper alignment of their actions with the necessary rules and provisions of the competition.
- Evaluation
 - The evaluation process undertaken by the organizers shall be conveyed well in advance and it is the responsibility of the participants to understand it well and align their actions in accordance with the same.
 - The organizers are not liable to provide any detailed information, feedback, reasoning for the actions taken during the evaluation of project submissions.
 - The organizers shall as far as possible take the necessary steps to ensure proper evaluation of the projects being submitted and shall convey to the participants in accordance with the feasibility allowed, the way and manner of prize distribution and related information.
 - The organizers shall endeavor to announce the results of the evaluation process as soon as feasible and by keeping in mind the quality of judging. The organizers are not liable for any inconvenience caused to the participants due to any delay during any part of the evaluation process.
- Prize money, swags and any other benefits
 - The organizers are responsible only for the prize monies and swag announced under the general track of the hackathon. Those prizes which are the responsibility of the

organizers i.e. The main cash prize to the top 100 teams shall be delivered to the identified participants within 30 days of the announcement of the results.

- The track prizes are the sole responsibility of the respective track sponsors, and the

organizers will provide necessary instructions to the participants to claim those prizes but the organizers shall not be liable for any delay on the part of the respective track sponsors.

- It is the responsibility of the participants to provide true and accurate information to the organizers whenever it is necessary to fulfill the successful delivery of all prize monies and swags, and the organizers shall not be held responsible in case of missing/incomplete/inaccurate information.
- All physical swags will be shipped out to one person from the team and necessary information will be asked for in due course of time. It is the responsibility of the team members to make necessary arrangements to share the swags among themselves and the organizers shall not be responsible for anything once the designated person from each team receives the shipment.
- Dispute resolution
 - All disputes arising shall be subject to the jurisdiction of Haryana state of India
 - The organizing team shall strive to conduct the hackathon in as fair manner as possible and would seek the cooperation of the participants. It is the responsibility of the participants to comply with the rules and ensure a healthy environment.

Code of Conduct

By participating in HACKHAZARDS '26 all the participants agree to all the rules and regulations applied by the organizers and communicated through this document as well as other channels such as social media and emails. All attendees, sponsors, judges, mentors, partners, vendors, volunteers and staff at our hackathon are required to agree with the following code of conduct. Organizers will enforce this code throughout the event. We expect cooperation from all participants to ensure a safe environment for everybody. By participating, speaking or interacting with HACKHAZARDS in any form, you agree to these terms.

May - July 2026

All attendees, sponsors, judges, mentors, partners, vendors, volunteers and staff at our hackathon are required to agree with the following code of conduct. Organizers will enforce this code throughout the event. We expect cooperation from all participants to ensure a safe environment for everybody. By participating, speaking or interacting with HACKHAZARDS in any form, you agree to the terms mentioned in this document.

If you feel uncomfortable or think there may be a potential violation of the code of conduct, please report it immediately to one of the event organizers or by emailing us at contact@namespacecomm.in. All reporters have the right to remain anonymous.

Our hackathon is dedicated to providing a harassment-free experience for everyone, regardless of the following:

- gender identity and expression
- age
- sexual orientation
- disability
- physical appearance
- socioeconomic status
- body size
- race
- ethnicity
- nationality
- religion
- previous hackathon attendance or lack of
- computing experience or lack of
- chosen programming language or tech stack

Participants asked to stop any behavior deemed as harassment are expected to comply immediately. If a participant fails to comply they will be asked to leave the event. Sponsors, judges, mentors, volunteers, organizers, HACKHAZARDS team, and anyone else at the event are also subject to the Code.

If a participant engages in behavior that violates the Code, the hackathon organizers will take any action they deem appropriate, including warning the offender or expelling them from the event.

By entering this Event, you represent and warrant that your participation complies with these Rules and that you have sufficient rights to (1) authorize the publication and dissemination of any submission materials and presentations ("Submitted Materials"); (2) allow the Organizers and Sponsors to use and to authorize others to use, publish and disseminate your Submitted Materials. Further, you are entirely responsible for your Submitted Materials, in whole or in part, if: (a) determined to be defamatory, offensive or otherwise inappropriate; (b) determined to violate any laws, rules or regulations; (c) determined to be infringing, or constitute a misappropriation of any intellectual property rights or confidential or proprietary information of any third party; or (d) determined to violate these Rules. Your Submitted Materials must be true and accurate and in compliance with these Rules in all regards. At any time, the Organizers at their sole discretion, reserve the right to remove your Submitted Materials from the Event, in whole or in part, for any violation of these Official Rules.

You acknowledge that the Event is intended to be a place where ideas are shared freely, and therefore acknowledge that any information that you share with other participants of the Event, the Sponsors and/or other third parties during the Event is solely at your discretion and risk. If you wish to protect your information, it is solely your responsibility to implement confidentiality and security measures with respect to the persons to whom you are disclosing your information. None of the Releasees shall have any responsibility under this Agreement or by virtue of their participation in the Event with respect to your information.

You acknowledge that the Organizers have the right to reject participants in the Event at their sole discretion.

You agree that the Organizers may share your registration details, LinkedIn/Github profiles, details of your Hackathon submission, and other information obtained from you in the course of, or relating to, the Event with the Sponsors, and acknowledge that such Sponsors may contact you during and after the Event. By agreeing to this document and/or participating in the Event, you are providing your express consent to communications by the Organizers and Sponsors (including email communications, both marketing and informational) respecting the products and services of the Organizers and Sponsors, and future events.

We do not tolerate harassment of hackathon participants in any form. Sexual language and imagery is not appropriate at any hackathon venue, this includes the following:

- hacks
- talks, presentations, or demos
- workshops
- any parties associated to the hackathon
- social media
- any other online media

Harassment includes offensive verbal comments related to gender, gender identity and expression, age, sexual orientation, disability, physical appearance, body size, race, ethnicity, nationality, or religion, sexual images in public spaces, deliberate intimidation, stalking, following, photography or audio/video recording against reasonable consent, sustained disruption of talks or other events, inappropriate physical contact, and unwelcome sexual attention.

Participants asked to stop any harassing behavior are expected to comply immediately.

May - July 2026

As this is a hackathon, we like to explicitly note that the hacks created at our hackathon are equally subject to the anti-harassment policy.

Sponsors, judges, mentors and partners are also subject to the anti-harassment policy. In particular, sponsors should not use sexualized images, activities, or other material. Sponsor representatives (including volunteers) should not use sexualized clothing/uniforms/costumes, or otherwise create a sexualized environment.

If you are being harassed, notice that someone else is being harassed, or have any other concerns, please contact a member of hackathon staff immediately.
